Company DescriptionTeamViewer is a leading global technology company that provides a connectivity platform to remotely access, control, manage, monitor, and repair devices of any kind – from laptops and mobile phones to industrial machines and robots. TeamViewer proactively shapes digital transformation and continuously innovates in the fields of Augmented Reality, Internet of Things or Artificial Intelligence. Since the company's foundation in 2005, TeamViewer's software has been installed on more than 2.5 billion devices around the world. The company is headquartered in Göppingen, Germany, and employs around 1,500 people globally.

Job DescriptionRemote Management is a fast-growing product within the TeamViewer product portfolio. Over the past several years we have successfully built and released products which makes IT administrators' day-to-day life easier. Our vision is to become a unified endpoint management solution for our customers. We are looking for a Fullstack Software Engineer (all genders) to join our R&D team in Stuttgart to actively contribute to the development of new features of our products. Design and develop new functionality for our software using C# and JavaScript. Optimize and enhance our software with new, efficient algorithms and modern software technologies. Work independently on solutions for specified requirements and will be responsible yourself for complying with time and quality specifications. Ensure that our software is stable and runs efficiently on many different browsers and systems (more than 2.5 billion installations). Monitor the latest technical developments on your field and make proposals for improvement.

QualificationsA university degree in the field of Computer Science, Information Technology or a related subject or relevant work experience. 2+ years of professional experience in the field of software development. Proven background in working with HTML, CSS, JavaScript, Object-Oriented JavaScript and expert level knowledge of React, Redux. Solid knowledge of JavaScript frameworks and tools like React, Redux, Webpack, etc. Ability to write a robust code in C# and .NET is a plus. Experience with TypeScript and testing frameworks (Mocha, Jest, etc.) is a plus. Understanding of Clean Code and Design Patterns for object-orientated programming. Fluency in English is mandatory, further languages such as German are a plus.

Additional InformationOnsite Onboarding in our HQ office for an optimal start. Great compensation and benefits packages including company achievement bonus and stock-based options, regular salary reviews. Premiums for the private pension plan (BAV) up to the maximum amount are topped up by TeamViewer. Public transport friendly offices. Option to lease an e-bike or use one of electric cars. Special terms for local gyms. Access to Corporate Benefits platform with many discounts. Regular Team events and company-wide celebrations. Open door policy, no dress code rules, frequent all Hands and Leadership Lunches. Hybrid and Flexible work time with up to 50% home office. Work From Abroad Program allowing up to 40 days of work outside your contracting country. We celebrate diversity as one of core values, join and drive one of the c-a-r-e initiatives together with us! TeamViewer is an equal opportunities employer and is committed to building an inclusive culture where everyone feels welcome and supported. We C-A-R-E and understand that our diverse, values-driven culture makes us stronger. As we continue to grow as a company, we also focus on enabling our employees to grow both personally and professionally. We are proud to have an open and embracing workplace environment that will empower you to be your best no matter your gender, civil or family status, sexual orientation, religion, age, disability, education level, or race.

What we're looking for Dive with us into the unknown, be creative, innovate and let us build great digital products together. We're looking for people that are happy to work in entrepreneurial, flexible but fast growing and changing environments. We are looking to establish a diverse team - for us that means that we are both welcoming people who are like us and people who are unlike us. This includes but is not limited to gender, ethnicity, age, academic or professional background, character traits etc. No matter what your background is, feel free to apply at hubblr. The role in a nutshell We are looking for a persona with experience in both frontend and backend who drives our success in client projects, participate in architectural & technical decisions and is able to build a digital product from early stages to scaling it up. Keywords: software engineering, medior, senior, consulting, fullstack About Ushubblr is a young company with a lot of passion for software developing and innovation. As an independent, young and agile team we develop with our clients comprehensive software applications while also consulting them in topics like product market fit, UI/UX-design and strategic software development. The hubblr team loves and lives product innovation. Therefore we also work on our own, internal projects creating new business models, testing them in their market segments and, if successful responses are measured, we bring them together to life. Your Responsibilities You will be joining a growing team of 17, located in Münster, Hamburg, Berlin, Munich, Cologne, Aachen and Sweden. Together with our team you will be working mainly on client-projects and sharing your experience with team members. You will be working mainly on backend and frontend related tasks in our projects. You will be actively participating in architectural and technological decisions for software projects. You will take over own responsibilities in projects, estimate developing tasks on your own and giving other coworkers advice on their work. You'll be reviewing code from other coworkers and actively be part of continuous improvement. When working on client-projects you will be partly responsible of communicating with their CTO / Stakeholder, joining conference calls/meetings on status update, time estimation and project management. Your Qualifications Experience in modern web technologies - Vue.js, React.js or similar framework (must-have) Experience in modern backend technologies - i.e. Golang, Node.js (must-have) Familiarity with agile software developing methods (must-have) Experience in common API techniques - HTTP, GraphQL, gRPC - at least 1 of them (must-have) Communication skills for constructive team feedback and client calls (must-have) Fluent in English (must-have) Living in the European Union (must-have) Experience in E2E tests (nice-to-have) Experience in TypeScript (nice-to-have) Experience in TailwindCSS (nice-to-have) Experience in CI/CD processes (nice-to-have) Ability to independently work on tasks (nice-to-have) Communication skills for constructive team feedback and client calls (nice-to-have) Your benefits A young and sympathetic team Flexible working hours A lot of room for your own ideas. We always highly encourage you to work on them together with the team. Modern offices at Hamburg "Oberhafenbrücke", the Münster "Prinzpalmarkt", at the "Görli" park in the factory Berlin or fully remote and in our VR-office in Spatial - that's up to you! Choose your tech equipment and education material A free public transportation ticket or bike with a maintenance agreement in the city you work in Regular team events and a creative working atmosphere CCC Ticket or other educational trainings / tools on request Bring your dog to work A progressive work environment - we provide VR Glasses (Oculus Quest 2) for you to experience immersive meetings from a distance A steep learning curve on internal and client projects and lots of ownership and responsibility from day one The application process Does this position sound like a good fit? Just fill out the form below. How will the application process look like? (Our aspiration to a good job application process will guide you from your initial email to a final job offer within 3-4 weeks. Weekly Screening (up to 1 week) You can expect us to screen your application within one week. You'll definitely hear from us - no matter the outcome of our decision First Round: Cultural Fit (1 week and 1 meeting) You get to meet one of our hiring managers in a 60 min. google meeting Second Round: Job Fit (1-2 weeks and 1 meeting + challenge) We'll evaluate with you how well you fit to the job at hubblr. Depending on the type of job you're applying for this might include Coding challenge (typically 1 week time to work on it) (for Coding related jobs) Case Study Final Decision (up to 1 week) We'll discuss within our team your fit We'll reach back to you within a week after the second round Frequently Asked questions (FAQ) "How can I make sure my application is as good as possible and is likely to be forwarded in the next stage?" To make your application as outstanding as possible, you can make sure to cover a few things: Provide as much context as possible by uploading all of the documents we ask for and answering all the questions ' Linking a meaningful video quickly introducing yourself and your professional experience ' Structuring and designing your resume according to this resource ' Writing a cover letter that adheres to the tips outlined here ' "How does the application process look like?" We have outlined the entire application process above. "I do not feel like the current roles on the job board fit me." We also happily accept initiative applications. There is a separate job post for them on our job board. "I do not live in one of your hubs in Germany or Spain - can I still apply?" You can for sure! If you live in another country than one we are currently operating in (Spain and Germany), we would ask you to either relocate to one of our hubs or evaluate whether freelancing is an option. We do that because opening a location in another country is coupled with a lot of overhead. If you already live in a country where we operate, remote working is perfectly fine. "I live in a country where you operate, but relocation within the country is not an option - Can I still work for you?" Yes definitely! The willingness to relocate inside countries where we operate is just one factor we consider in applications. If you score well on other dimensions, there is no problem hiring

you. "I need to relocate and I am willing to do that as well - can you help me in any way with that?"Yes. We can help you with the administrative aspects of relocating to countries where we operate. It is also no problem if you need a working permit etc. - We will help you to the best of our abilities. "What do you mean with choose your own tech?"We have the credo that we give you all the tools you need to efficiently do your job. This does not only extend to physical equipment but also education material. Choose your own tech means that if you feel like you need any physical or educational equipment, we will try to make it possible for you. Does this position sound like a good fit?We would be very happy to welcome you! Ø>Ÿ

We are TradeLink. Changemakers for the world's backbone of global trade – B2B supply chains. TradeLink is our answer to our initial question of /what the most exciting company /in the world would look like. We are building the /collaboration layer for one of the /largest, /most fragmented, and physically complex /industries in the world and we are reinventing /what /B2B software looks like along the way together with people who simply love what they do. In the past 6 months, we ignited the network and grew x-fold on all exciting metrics (people, usage, partners) and recently closed our €12mn Series A led by Insight Partners and our existing investors Point Nine and Fly Ventures. Join our crazy ambitious team to tackle the core problems of a trillion-dollar industry and work alongside the most humble, talented, and passionate. We are looking for a (Senior) Fullstack Developer to join our team. You will actively shape the growth path of our organization to become Europe's leading logistic collaboration platform provider. Take the unique opportunity and join an early-stage start-up and connect logistics on the road in Europe. Your Responsibilities

- Manage Agile Development Cycle
- Participate in Grooming's, Sprint Meetings, Technical Estimation, Retrospective and Reviews
- Actively communicate the status of your work, problems, shortcomings and changes
- Be open to give feedback to product owners, stakeholders and your team members
- Be open to receiving feedback from anyone to learn and grow
- Do Merge Reviews
- Develop Features End-To-End
- Help in feature ideation and definition
- Develop frontend and backend and perform user acceptance testing with product
- Deploy and monitor features by monitoring business KPI's and tech performance
- Strive for technical excellence
- Implement your feature as you would open-source it
- Understand DRY, CoC, and own the RoR doctrine
- Feel comfortable to add to our 400+ unit, integration and system, tests
- Be a mentor and have a mentor in and outside of the team
- Actively learn about the latest developments and updates
- Don't get emotional about your code. We all have been there...

WHAT YOU NEED TO SUCCEED

Experience: You have successfully completed a relevant degree or have more than five years of experience in web development - and you are enthusiastic about the challenges of the logistics industry

Stack Skills: You can handle our stack professionally and quickly. At TradeLink we work with: Ruby on Rails, React.js, Bootstrap, SCSS, PostgreSQL, Redis, ElasticSearch, and Heroku for Continuous Deployment

Communication: you are an absolute communication talent. You have a high degree of empathy, are committed, and are interested in your interlocutors and their problems. You have an excellent written and spoken command of English

Proactivity & Motivation: You are characterized by a very high level of proactivity, an irrepressible hunger to learn, and a constant desire to develop yourself further. Nothing throws you off track so quickly

Character: You love to be challenged and thrive in a fast-paced environment. Like us, you are a person of conviction and you feel like you will thrive in our culture

WHAT'S IN IT FOR YOU

Being part of an exceptionally fast-growing product-led venture that's up to something big. We are building a new type of company, a SaaS-enabled B2B network

A job and a team full of passion. Working alongside enthusiastic people motivates us and gives us gratitude

You will have lots of autonomy, flexible working hours, and a remote-first setup (optional offices in Munich and Berlin), which connects our team members across Europe

An extremely steep learning curve - we support your continuous development through individual learning opportunities, a diverse and international team of experts as well as experienced founders

With regular team events, we encourage our teams to connect within and outside of work for a great spirit

A phenomenal company culture, both remote and in our optional offices

If you aren't completely confident that you meet our criteria, we recommend just take the chance and apply anyway! Curiosity, passion for digital disruption, eagerness to learn, a collaborative spirit, and a growth mindset are most important to us. TradeLink strongly believes in the power of diversity and is highly committed to providing a respectful, safe, and welcoming environment for everyone who works here or with us.

About This Position You're looking for an exciting new opportunity to not only be part of a fast growing Compliance software startup but also grow personally? You're an expert when it comes to creating a product customers love while also automating manual internal processes? Then heyData is your next stop! In the role of Fullstack Engineer, you will be part of the team which is responsible for building different services that should enable further growth of our customer base. You will be responsible for building solutions that will improve our customer experience while also automating manual internal processes. Together with other team members, you will take ownership of all products built by the engineering team and always seek ways to invent and simplify. Your mission Design and implement software solutions that help heyData reach its goals Collaborate with relevant stakeholders to understand the vision and product requirements Review the code of others and provide thoughtful and constructive feedback, and vice versa Take pride in writing maintainable code and seek personal growth Your profile One year and more of experience or equivalent knowledge in building web applications with CSS, HTML, VueJS or ReactJS, Nodejs (Express or NestJS), JavaScript in general, relational databases, and/or NoSQL Understanding communication protocols between system components such as HTTP, RESTful and RPC. Being able to write testable code while having experience working with some of the testing frameworks (Jasmin, Cypress, Jest) Experience in building and running the stateless containerized application with Docker or have the desire to learn how to do it Willingness to learn new technologies, tools, and programming languages Excellent communication skills in English Why heyData? Become part of a young success story and build the leading compliance startup with us Join a young and dynamic team with experience from top-tier consultancies, startups, VCs, and law firms The opportunity to grow with us and achieve your further personal goals combined with a high degree of decision-making autonomy A clear internal talent development path with exciting opportunities for career progression State-of-the-art technology equipment, regular team events, and a hybrid company culture with the freedom to work from our beautiful office in the heart of Berlin or remote. About us At heyData, we are determined to serve our mission: making Compliance easy for everybody! We thrive to become the go-to partner for SMBs globally by building a solution that helps them to refocus on their main tasks. On the highway to > 1000 customers, we support known market leaders, such as JOKR, Razor Group, Planetly & many more. They all rely on our solution to quickly become data privacy compliant with the help of cutting-edge software and legal know-how. Being part of the heyData team means being part of something big. We just raised a €3.3m seed round and as one of our first 40 employees, you will get the chance to shape, design, build, and decide on foundational aspects from scratch: product, tech stack, hiring, brand, company culture, etc. It means shaping the future of data protection, the future of our company, and at the same time: Your own. Our Company Values: Trust is our polar star - Both inside and out, we stand for integrity, sincerity and reliability. Our products serve not our needs but our customers. We take accountability for our customers' compliance. We are on fire - We are passionate about compliance because it serves the greater good. We are ambitious do-ers - We work hard and take ownership of our tasks. We provide best-in-class service to our customers. Diversity is our backbone - Our strength arises from our differences Innovation comes from bringing together various views. We take pride in being different. We are one tribe - Everything we do is a team effort. We are humble and never put ourselves above others. We recognize and celebrate the successes of our teammates

Software Engineer - FullStack (m/f/d)

Company: Yilu

location: Berlin, Berlin, Germany

level: Not Applicable

https://de.linkedin.com/jobs/view/software-engineer-fullstack-m-f-d-at-yilu-3475915474?refId=CJjupni8A4fqmoxXeulJoQ%3D%3D&trackingId=a8DxVLMp2IZ1NMWoookQRw%3D%3D&trk=public_jobs_topcard-title

At Yilu - the first start-up founded by the Lufthansa Group - we are looking for Software Engineers - FullStack (m/f/d) to join us in our mission to develop and build high-performing, scalable, distributed applications to make travelling more connected, convenient & trusted. We are looking for Software Engineers - FullStack (m/f/d) to design and build scalable and performant applications using engineering best practices. By driving engineering and operational excellence at Yilu, you will collaborate with other engineers to deliver state-of-the-art digital products and features on top of our API first and features on top of our API first microservice-based platform. Our current projects focus on commercial products and verticals for an Ancillary Marketplace (insurance, parking, lounges, retail, mobility, events and tickets etc.). What you'll be working on: You work as a Software Engineer - FullStack (m/f/d) in cross-functional product teams of our Agile Factory. You utilize best engineering practices for designing, developing, testing and maintaining digital products and features. You are responsible for long-term code quality and reliability. You apply your analytical skills and agile mindset with a focus on delivering user value. You proactively take ownership of tasks and take them to completion. Learn, collaborate, and teach other engineers. What you bring along: You have solid experience in modular, reusable, and testable code development with React, JavaScript (including Node.js framework) and TypeScript. You have a deep understanding of Frontend security, API integrations, browser security policy and related APIs. You have a strong understanding of Static Site Generation (SSG) and Server Side Rendering (SSR) with frameworks like Next.js or Gatsby. You are familiar with design systems, atomic design principles and component libraries (eg. Storybook, Headless UI, Styled Components). You have hands-on experience with frontend-related CI/CD processes; such as building/bundling and deployment of code with technologies like Webpack, Babel, Docker, Travis/Github Actions etc. You worked on Error Reporting and with Monitoring tools like Sentry, Datadog or New Relic. You know how to integrate third-party web applications (REST APIs, GraphQL, OAuth 2.0 / OpenID Connect, Headless CMS). You have experience with at least one of the SQL/NoSQL technologies like Postgres, MongoDB, Redis or Elasticsearch. You worked on serverless applications using AWS Lambda, API Gateway, S3. You are familiar with web servers or proxies such as NGINX, CDN etc. You know design patterns and worked with large-scale multi-tenant applications. You know how to build event-based/ service-oriented applications using tools like Kafka, Rabbit MQ, AWS SNS or similar. You are fluent in English, both written and verbal. You have experience with agile, test-driven development and continuous delivery. What we bring to the table: 30 days of annual holiday. A yearly personal development budget of €2000 for training professional growth, plus access to LinkedIn Learning. Remote-friendly and flexible working hours, plus the possibility to work from anywhere in Germany. A choice between Urban Sports Club membership OR Givve card OR Rydes Mobility budget. Centrally located office in Berlin-Mitte, with great transport connections and fully equipped with snacks and drinks. Lufthansa Corporate discounts. Hardware of your choice to make the magic happen! Yilu is an independent company within the Lufthansa Group. Since 2018, we are working in our Berlin-based headquarters. Now, we are looking for you as an addition to our team! If we've aroused your interest and you want to transform the way people travel with us, apply now and let us know why you're the one for the job! Yilu is an equal-opportunity employer and values diversity. We are committed to equal employment opportunity regardless of sex, race, color, religion, ancestry, national origin, sexual orientation, age, citizenship, marital status, disability, or gender identity. All employment is decided based on qualifications, merit and business need.

We are TradeLink. Changemakers for the world's backbone of global trade – the supply chain. We are on a mission to build the digital solution for delivery and transport coordination around the warehouse. We deliver technology for all cargo in transit to maximize operational efficiency by connecting buyers, suppliers and logistics service providers together in the cloud to keep track of information and delivery status – anytime, anywhere. We are reinventing /what /B2B software looks like along the way together with people who simply love what they do. In the past 6 months, we ignited the network and grew x-fold on all exciting metrics (people, usage, partners) and recently closed our €12mn Series A led by Insight Partners and our existing investors Point Nine and Fly Ventures. Join our crazy ambitious team to tackle the core problems of a trillion-dollar industry and work alongside the most humble, talented and passionate. Tasks Your users are the logistic managers, warehouse workers and dispatchers of Europe. They orchestrate the global flow of goods. If you love logistics and if you are excited about onsite operational processes, your customers will admire you. You are an important part of an independent and interdisciplinary squad. You are on the team's technical forefront and work alongside your dedicated Product Manager and Product Designer in a fully equipped engineering team. Manage Agile Development Cycle Participate in Grooming's, Sprint Meetings, Technical Estimation, Retrospective and Reviews Actively communicate the status of your work, problems, shortcomings and changes Be open to give feedback to product owners, stakeholder and your team members Be open to receive feedback from anyone to learn and grow Do Merge Reviews Develop Features End-To-End Help in feature ideation and definition Develop frontend and backend and perform user acceptance testing with product Deploy and monitor features by monitoring business KPI's and tech performance Strive for technical excellence Implement your feature as you would open source it Understand DRY, CoC, and own the RoR doctrine Feel comfortable to add to our 400+ unit, integration and system, tests Be a mentor and have a mentor in and outside of the team Actively learn about latest developments and updates Don't get emotional about your code. We all have been there... Requirements Experience: You have successfully completed a relevant degree or have more than five years of experience in web development - and you are enthusiastic about the challenges of the logistics industry. Stack Skills: You can handle our stack professionally and quickly. At TradeLink we work with: ruby on rails, reactjs, bootstrap, sass, postgres, redis, elasticsearch, heroku for continuous deployment, react native, react-native-paper, raspberry pi, opencv. Communication: you are an absolute communication talent. You have a high degree of empathy, you are committed and you are interested in your interlocutors and their problems. You have a very good written and spoken command of English. Proactivity & Motivation: You are characterised by a very high level of proactivity, an irrepressible hunger to learn and a constant desire to develop yourself further. Nothing throws you off track so quickly. Character: You love to be challenged and thrive in a fast-paced environment. Like us, you are a (wo)man of conviction and you feel like you will thrive in our culture. Benefits Being part of an exceptionally fast-growing product-led venture that's up to something big. We are building a new type of company, a SaaS-enabled B2B network. A job and a team full of passion. Working alongside enthusiastic people motivates us and gives us gratitude. You will have lots of autonomy, flexible working hours and a fully hybrid setup which connects our headquarter in Munich with teams all over the world. An extremely steep learning curve - we support your continuous development through individual learning opportunities, a diverse and international team of experts as well as experienced founders. With regular team events we encourage our teams to connect within and outside of work for a great spirit. A phenomenal company culture, both remote and in our office enjoying the start-up community of Werk1 in Munich. If you aren't completely confident that you meet our criteria, we recommend to just take the chance and apply anyway! Curiosity, passion for digital disruption, eagerness to learn, a collaborative spirit and growth-mindset are most important to us. TradeLink strongly believes in the power of diversity and is highly committed to provide a respectful, safe, and welcoming environment for everyone who works here or with us.

https://de.linkedin.com/jobs/view/fullstack-software-developer-f-m-d-at-lanthan-safe-sky-gmbh-3551487733?refId=%2F3Vx9O1wnT4Q0KuPachrjw%3D%3D&trackingId=HBYwWpo0r1hD80py7zjEyA%3D%3D&trk=public_jobs_topcard-title

Lanthan Safe Sky GmbH is a leading provider of technical solutions for Aircraft Detection Lighting Systems (short: ADLS) based on transponder signals, which are distributed and implemented worldwide. Our mission is to make the sky safe and the nights dark to contribute to the acceptance and future viability of the wind energy industry. After our founding in 2020, we were able to put the world's first transponder-BNK system into operation in 2021. With our rapidly growing team, we are now the market leader in Germany with the first projects abroad. We have already switched dark hundreds of wind turbines with LSS technology, and several thousand are under contract and will soon follow. Our team is growing and we are looking for a Fullstack Software Developer (f/m/d) as soon as possible. Tasks You are responsible for the maintenance and further development of our frontend (Vuetify/Vue/NuxtJS) and backend microservices (NodeJS/Express) on the Google Cloud Platform (GCP). You are responsible for the maintenance/monitoring of the GCP services used (including databases MongoDB, PostgreSQL, Redis), as well as integration/extension into new GCP tools/services. You maintain and improve the CI/CD pipeline. Requirements You already have relevant professional experience in JavaScript frontend/backend development. You can quickly recognize interdependencies even with complex technical challenges and enjoy finding suitable solutions for them. You are a team player and enjoy working with various stakeholders. You have a high sense of ownership and are self-organized. You are fluent in English. Preferred additional qualifications: Experience in JavaScript frontend development with NuxtJS/Vuetify/Vue. Experience in JavaScript backend development with NodeJS/Express. Experience with databases MongoDB, PostgreSQL, Redis. Experience in DevOps Google Cloud Platform, in particular load balancer, IAM, cloudbuild, pubsub, cloud run, cloud function, big query, data flow. Experience with GitHub and GitHub Actions. Experience in avionics/aviation. Experience with network technology. Basic knowledge of the German language. Benefits Make a significant contribution to increasing acceptance of wind energy - we offer you to be part of an established start-up in a highly innovative and future-oriented environment. You can take over challenging and important tasks in a growing team and grow beyond yourself. We work in an agile manner and in flat hierarchies - short decision-making processes and an open failure culture are part of our company culture. Experience our culture of appreciation and feel like you as a person count. Work in a setup that suits your life: whether hybrid or fully remote, with flexible working hours and part-time - you decide what suits you best. Your home office equipment is on us, including Lenovo laptop, two monitors, a height-adjustable table, and an ergonomic office chair. Time for recovery - enjoy the break you need with 30 days of paid vacation per year. We are an equal-opportunity employer and value diversity. All hires are made based on qualifications, performance, and business requirements. We believe that diversity improves our decision-making and we strive to build a team that represents a variety of backgrounds, perspectives, and skills. We look forward to receiving your application! If you have any questions, please feel free to contact the recruiting team.

Company DescriptionFounded in 1996, mobile.de disrupted the status quo of buying and selling cars with the first online vehicle marketplace, driven by the idea to create something new. As a driver of change for growth and innovation, we became more than just a platform. We are an ecosystem of skilled and entrepreneurially minded people, a community to unite sellers and buyers. As the No 1 marketplace in Germany we closely cooperate with a powerful network of around 42,000 dealers and connect them with almost 17 million unique users per month. Mobile.de is part of Adeviata: a global online classifieds specialist and sustainability leader with 40+ products in 15 countries.

Job DescriptionWe are seeking a professional individual to join our team as a Senior Software Engineer - Fullstack / Focus Backend (d/f/m). In this role, you will be part of a cross-functional product development team. You will work with a team of Product Managers and Team Leads and guide the team to develop the optimal product for our users and operations teams.

About The TeamYou will be joining our Online Car Buying business unit where we strive to ensure that every consumer can realize their individual mobility change online with confidence and trust. As part of this creative and agile business unit, we together have the opportunity to drive mobile.de's strategic ambition to extend its footprint and help consumers and dealers to trade cars fully online!

What You'll DoDevelop and maintain frontend and backend solutions for consumer-facing applications. Together with your cross-functional team, take ownership of the entire development lifecycle, from requirements specification, implementation, test automation and quality assurance to deployment and monitoring. Partner closely with product and business to find pragmatic solutions to our customers' needs. Contribute to the team's work with clean, maintainable and testable code and participate as well as lead design and code reviews. Actively contribute to shaping the business, culture and way of working of the new Digital Marketplace squad. Think outside of the box and suggest innovative solutions to challenging problems.

QualificationsYou are a passionate and experienced backend developer. Experience with Java/Spring Boot based backend technologies; NodeJS is a plus. You are able to speak Javascript/Typescript as your foreign language. Experience with modern JS frameworks (React.js or similar technologies) is a plus. You have basic understanding about CSS technologies (CSS3, CSSnext) and relevant supporting technologies such as Webpack, Express.js. You can drive test automation. Agile development methodologies and continuous improvement of your team are your preferred way of working. You have a pragmatic mindset and a can-do attitude. You are able to multitask, work with minimal supervision, and willingness to help team members. Experience with A/B testing tools (such as Optimizely) and tracking/analytics tooling (Google Analytics and/or backend tracking) is a plus. Communication is key, and you can communicate context-specific and to the point. You have excellent interpersonal skills, and you can collaborate closely with people across the global business and cross-functions. You are proficient in English. German is a plus.

Additional InformationWhat you'll get from us: A unique position in an international and dynamic environment. The chance to be a key player in a growing, highly skilled team. Great colleagues and a healthy working environment. Competitive compensation package, benefits including stock purchase plan and annual bonus plans, pension plan. Flexibility to work when and how you want - flexible hours, autonomy to set your own agenda, choice of phone and computer. Smart Working Policy - work remotely some of the time, balanced with time in the office together with your team - between 5 and 45 days per quarter in the office depending on each team. 'Work from anywhere' weeks - up to four weeks working from anywhere, including from another country, as long as you have an internet connection! Attractive, modern office locations: Berlin-Charlottenburg & Dreilinden closed to Berlin Wannsee. Career development, including individual training budget and language classes. 28 days of holidays. Adeviata is an equal opportunity employer and we value diversity. We do not discriminate on the basis of race, religion, colour, national origin, gender, sexual orientation, age, marital status or disability status. All interviews are currently taking place virtually.

Full-time employment | Permanent | ASAP | Remote (in Germany) or In-Office (in Berlin) Our mission at Architrave is to revolutionize the processes and workflows within the Real Estate industry, by building and providing a data-driven SaaS platform. The vision is not only to transfer paper into documents but to really digitalize the industry. We strive for constant innovation using state-of-the-art technology, to not only extract data but to analyze and learn from it, using Machine Learning and other Big Data technologies in order to create real value and a unique experience for our customers. Be part of this one-of-a-kind organization and join us in our journey towards the revolution of data and Real Estate.

Your Future Responsibilities: Build efficient and robust workflows between our internal services and external ones using the vendor APIs Design, implement and document RESTful APIs for our applications and services Design and implement cutting-edge, high-performing React single-page applications from scratch, which rely on a cloud-based microservice architecture and will transform the real estate industry Integrate third-party tools into our AWS-based platform landscape Implement proper error-handling mechanisms Assess technical feasibility in build vs. buy analysis Design and implement data storage solutions for structured and arbitrary data and their relations, which are secure, highly available and GDPR compliant Take a significant role in the decision-making of Architrave's service-oriented architecture Help and mentor other engineers to develop further

What You Should Bring With You: At least four years of experience with PHP and Python, as well as profound knowledge of at least one other language At least three years of experience in modern web technologies (ES, HTML, TypeScript, CSS) and profound knowledge of React Profound knowledge of AWS integrations and services Professional experience with Elasticsearch/OpenSearch and Texttract is a big plus Hands-on experience with WebHooks and API design Experience with SPA and API-intensive applications is essential Professional experience with Docker and K8s Excellent communication skills to explain complexity in a straightforward way User-driven and value-driven mindset, to create the best solutions for our customers Fluent in written and verbal English communication. German is not mandatory, but a plus.

What We Offer: A competitive compensation, flexible working hours and a family-friendly work ethic A great place to grow and to take over responsibility, professionally and personally Short and open communication flows and quick decision-making processes A working environment that values individuals and embraces knowledge sharing A highly motivated and talented team that likes to deliver great work while having a good time Company and team events that include table-tennis competition, cooking and jokes with great potential from our CEO and founder Maurice Ø=Þ A beautiful and modern office in Berlin - near Treptower Park - where you can go to work, play table tennis, have meetings and hang out with your colleagues. Given said that we are currently working remotely with the option to only come to the office under current state regulations (testing on the day, mask in all common areas etc. A fully equipped kitchen and dining area with free drinks in our Berlin Office Employee discounts for BVG, Urban Sports Club, LPG Biomarkt and more So, what are you waiting for? Hit that "Apply for This Job" button and send us your application! Know someone else who might also be interested? Share this page with them! Thanks a bunch! Ø=Þ Being an employer providing equal opportunities, Architrave strives for a diverse, inclusive, and healthy working environment. We invite all qualified humans to apply, regardless of ethnicity, colour, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability or gender identity.

Workplace: We're happy to have our employees working in our office or remotely. Currently, remote employees are expected to live in Germany in order to be able to join team events and meetings physically from time to time, if meaningful and secure. In order to contribute to our society and healthcare system, during the COVID-19 pandemic time our offices in Berlin & Dresden remain open (while allowed) with limited capacity and proper safety and hygiene plan. After the pandemic, we expect our remote employees to be able to join us in our regular company and team events a few times a year. Find us on Glassdoor!
