[refId=DffLCCXgrxwmKOVYkh0Z1Q%3D%3D&trackingId=AN5w0xqa5%2FfWGyTsSipXNg%3D%3D&trk=public\\_jobs\\_topcard-title](https://de.linkedin.com/jobs/view/senior-frontend-engineer-m-f-d-at-airfocus-3693542849?refId=DffLCCXgrxwmKOVYkh0Z1Q%3D%3D&trackingId=AN5w0xqa5%2FfWGyTsSipXNg%3D%3D&trk=public_jobs_topcard-title)

## Your mission

airfocus, the world's first modular product management platform, is growing on all continents. We have proven to be an up-and-coming industry leader with a proven business model and a first-class team. Now, with thousands of users from customers like Shopify, Caterpillar, or The Washington Post, it's time to add fuel to the fire and further scale up our product-led growth!

As our senior frontend engineer specializing in React and TypeScript, you will be responsible for crafting seamless and intuitive user interfaces that drive exceptional user experiences. In addition to your outstanding technical skills, you possess the ability to inspire and guide a team of developers to create high-quality, and scalable results. You will collaborate closely with the tech lead and CTO, mentor engineers, and contribute to architectural decisions.

## Our tech stack

React frontend with React-query for asynchronous state management.

Modular architecture with multiple extension packages that extend the core application managed in a monorepo for the frontend.

Typescript definitions for data fetching provided by the backend.

Separate repository for UI components.

React, NextJS, dnd kit, Turbo, Slate, Kubernetes, GitHub.

## What you'll do

Improve and maintain our application architecture.

Implement complex and reusable React components from drag & drop to rendering large data collections.

Work closely with product managers and designers to refine and implement new feature concepts.

Review and test the work of your peers throughout all stages of the development cycle.

Collaborate with backend engineers to integrate frontend interfaces with backend APIs.

Diagnose and troubleshoot frontend issues, ensuring timely resolution and a seamless user experience.

Mentor junior members of the frontend team, sharing your expertise and providing guidance on best practices.

## Your profile

Profound experience as a frontend/ fullstack engineer (6+ yrs of experience).  
Profound knowledge in React and TypeScript.  
Profound knowledge in modern CSS.  
Experience in modern HTTP Rest APIs.  
Knowledge in writing tests.  
Agile mindset.  
Working autonomously as well as being a team player.  
You could win a debate on tabs vs. spaces conducted entirely in English ;)  
Nice to have: Experience with Docker.

Why us?

Remote first team: Work from our cool HQ in Hamburg or anywhere in Europe - forever!  
Flexible working hours  
Boost your personal development and gain new skills in an exhilarating space.  
Competitive compensation.  
Project squads with rotating team members  
MacBook Pro or notebook of your choice.  
Healthy (and non-healthy!) snacks and beverages (if you're in Hamburg).  
Annual airfoks meet-ups!

About Us

At airfocus, we're reimagining the way teams make decisions. From how they prioritize their never-ending list of features, ideas, and projects to how they create beautiful yet effective roadmaps, the work we do is shaping the future of collaboration and strategy. To get there, we've brought together a collective of optimists and doers to tackle challenges along this ride. We believe in learning by doing – and that there is no better classroom than real-world experience.

We strive for product excellence, a superior user experience, and great storytelling because we believe those are the best ways to create value for our customers and employees. Our team is made up of talented individuals who are highly motivated to grow our company and themselves – and have fun in the process.

Join us and help shape an amazing company. From Hamburg, or wherever you best get stuff done.

Annual airfoks meet-ups!

About Us

At airfocus, we're reimagining the way teams make decisions. From how they prioritize their never-ending list of features, ideas, and projects to how they create beautiful yet effective roadmaps, the work we do is shaping the future of collaboration and strategy. To get there, we've brought together a collective of optimists and doers to tackle challenges along this ride. We believe in learning by doing – and that there is no better classroom than real-world experience.

We strive for product excellence, a superior user experience, and great storytelling because we believe those are the best ways to create value for our customers and employees. Our team is made up of talented individuals who are highly motivated to grow our company and themselves – and have fun in the process.

Join us and help shape an amazing company. From Hamburg, or wherever you best get stuff done.

# Senior Frontend Engineer (m/f/d)

Company: airfocus

location: Hamburg, Hamburg, Germany

[refId=DffLCCXgrxwmKOVYkh0Z1Q%3D%3D&trackingId=AN5w0xqa5%2FfWGyTsSipXNg%3D%3D&trk=public\\_jobs\\_topcard-title](https://de.linkedin.com/jobs/view/senior-frontend-engineer-m-f-d-at-airfocus-3693542849?refId=DffLCCXgrxwmKOVYkh0Z1Q%3D%3D&trackingId=AN5w0xqa5%2FfWGyTsSipXNg%3D%3D&trk=public_jobs_topcard-title)

## Your mission

airfocus, the world's first modular product management platform, is growing on all continents. We have proven to be an up-and-coming industry leader with a proven business model and a first-class team. Now, with thousands of users from customers like Shopify, Caterpillar, or The Washington Post, it's time to add fuel to the fire and further scale up our product-led growth!

As our senior frontend engineer specializing in React and TypeScript, you will be responsible for crafting seamless and intuitive user interfaces that drive exceptional user experiences. In addition to your outstanding technical skills, you possess the ability to inspire and guide a team of developers to create high-quality, and scalable results. You will collaborate closely with the tech lead and CTO, mentor engineers, and contribute to architectural decisions.

## Our tech stack

React frontend with React-query for asynchronous state management.

Modular architecture with multiple extension packages that extend the core application managed in a monorepo for the frontend.

Typescript definitions for data fetching provided by the backend.

Separate repository for UI components.

React, NextJS, dnd kit, Turbo, Slate, Kubernetes, GitHub.

## What you'll do

Improve and maintain our application architecture.

Implement complex and reusable React components from drag & drop to rendering large data collections.

Work closely with product managers and designers to refine and implement new feature concepts.

Review and test the work of your peers throughout all stages of the development cycle.

Collaborate with backend engineers to integrate frontend interfaces with backend APIs.

Diagnose and troubleshoot frontend issues, ensuring timely resolution and a seamless user experience.

Mentor junior members of the frontend team, sharing your expertise and providing guidance on best practices.

## Your profile

Profound experience as a frontend/ fullstack engineer (6+ yrs of experience).  
Profound knowledge in React and TypeScript.  
Profound knowledge in modern CSS.  
Experience in modern HTTP Rest APIs.  
Knowledge in writing tests.  
Agile mindset.  
Working autonomously as well as being a team player.  
You could win a debate on tabs vs. spaces conducted entirely in English ;)  
Nice to have: Experience with Docker.

Why us?

Remote first team: Work from our cool HQ in Hamburg or anywhere in Europe - forever!  
Flexible working hours  
Boost your personal development and gain new skills in an exhilarating space.  
Competitive compensation.  
Project squads with rotating team members  
MacBook Pro or notebook of your choice.  
Healthy (and non-healthy!) snacks and beverages (if you're in Hamburg).  
Annual airfolks meet-ups!

Exmox is a Hamburg based mobile marketing agency, connecting advertisers with their highest value users through our owned and operated apps. We created an innovative business model that focuses on rewarding users for testing and engaging with the apps of our clients. We're on a mission to scale our platform and provide the best user experience for our users and are looking for ambitious individuals who are eager to contribute to our growth. Are you ready to make an impact? Become part of our growing team and help shape the future of performance marketing. Tasks! You actively shape your position, we want you to get involved and contribute ideas. You will work in a cross-functional team and combine your expertise with the of your team members to ensure rapid feature development, highest automation and of course a great product. You are taking care of testability, app performance and the software architecture for an application that is used by millions of active users at a time. Responsible for coordinating/deploying releases of the software. You love to develop a beautiful frontend for the end-user to ensure great usability and UX. You ensure the stability and reliability of our services with the help of metrics and logging tools. You present your results to other areas of software development and take care of their operational implementation, gladly passing on your knowledge to them. Requirements: Have experience (2+years) in developing with Vue.js and Nuxt.js. You have experiences with Python, FastAPI and PostgreSQL. You are common with scss and ideally a css magician. Enjoy working together closely with DevOps, backend engineers, QA engineers and product people. Are keen to receive and give feedback in pairing and code review sessions. Have strong communication skills and a customer-driven mindset. Communicate fluently in English. Benefits: Work Life Balance. We value rest and work life balance, we offer you 30 days of paid vacation days. Commuter Benefits. We provide you with public transportation tickets. Professional Development. We support you in deepening your skills and provide you an annual education budget of 1.500€. Workation. Combine Vacation with work: we offer annual workation opportunities. Gym membership - Wellpass. With Wellpass you can use more than 7000 Spas/ Gyms/ etc. in Germany. Catering. We offer monthly team lunches, daily fruits and vegetables and every beverage you could wish for. Flexibility. Benefit from flexible working hours and working from home. Diversity. We are an international team of talented people with different cultural backgrounds. Fun and Games. We have a big socializing area to make room for having relaxing activities within the working day. Desk Setup. Wherever you work, we will provide you with your workspace utensils. Please note: this is not a remote only position, we offer you a flexible hybrid model here in Hamburg, Germany :) We're just at the beginning of what's possible. We'd love to welcome you aboard our team. This fits your ideas exactly or you're still unsure if it's really the right fit? Feel free to contact Julia and together we will find out. :)

The zetcom group is one of the worldwide leading management software companies for cultural institutions (museums & collections), managing organizations (foundations & associations) and environment departments (governments & corporations). More than 1'000 customers in 30 countries use our configurable and customizable software (SaaS) to record cultural heritages, to manage daily business or to govern environment-relevant facilities. They are taken care of by our headquarters in Switzerland as well as our offices in Germany, France, Spain and USA and our worldwide partners. You will join our Core Development team and make an important contribution to the development of our RIA framework which is the foundation of our SaaS offering. The RIA framework is based on Java/Jakarta EE in combination with PostgreSQL, Payara, Vaadin (HTML5) and is being continuously developed and enhanced by an international team. Our Core Development Team consists of five developers, and every developer is dedicated, proactive, hardworking, and forward-looking. We work with a high level of integrity, and attention to detail, and look for a colleague who shares our passion and high standards. Bring your expertise and IT skills to us. An attractive combination of innovative products, a progressive environment and an interesting market is waiting for you. To join our Team, working out of Berlin/ Warsaw (with a hybrid, partially remote working model) we are looking for an experienced Java Fullstack Developer, f/m/d, permanent, 80 – 100%. Tasks This role includes (but is not limited to): Participate in requirements analysis with product management. Collaborate with internal teams to produce software designs and architectures. Develop clean, scalable, and performant code using Java and Java/Jakarta EE. Responsibility for unit and integration tests. Revise, update, refactor and debug code. Continuously improve existing code base. Develop documentation throughout the software development life cycle. Serve as an expert on specific sections within the framework and provide technical support. Requirements What you should bring: Bachelor's or Master's degree in Computer Science or a related field. 3+ years of experience in Java/Jakarta EE development. Good understanding of Java EE/ Jakarta EE design patterns, frameworks, and APIs. Knowledge of SQL and relational databases (PostgreSQL is an advantage). Experience with Java application servers (Payara is an advantage). Excellent problem-solving skills and attention to detail. Strong written and verbal communication skills. Approachable, ready to help and a team player. Ability to work independently as well as part of a team. Fluent in English. German or French are pluses. Resident in Germany or Poland with valid work permit for the EU (Blue Card). Benefits What we offer: Close collaboration with your teammates. Colleagues who are eager to support your onboarding. Flexible hybrid working model including workation, equipment for home office. Modern Java/Jakarta + SQL tech. Stack. Strong focus on Java. Your ideas have an important impact and cover a wide range of projects and topics. (eeal Fullstack Development) Amazing worldwide customer base with unique collections, cultural heritage and environmental background. International team, diverse culture with flexibility and responsibility. Are you ready to help the team make an impact? We look forward to receiving your CV. If you have any questions, feel free to reach out to us!

Why Quintic Digital GmbH? We are committed to sustainably improving the way education (EdTech) works through technology. Ready for new challenges? Are you passionate about the Development world and want to use and improve your skills in programming .NET applications and working in an Impact-Environment? With our Kidling digital ecosystem for daycare centers, you can put your know-how to use right away, and we'll make you fit. Is this exactly your thing? Then live your passion in a senior position and become part of our 15 developers and join our nice office in Berlin, Prenzlauer Berg. When, Where, and What: Start: asap Location: Berlin, Prenzlauer Berg Remote: by arrangement Annual gross salary: from 60,000 Euro - 90,000 depending on experience Tasks These tasks are waiting for you: We work in an agile software development approach (Mainly Scrum) in cross-functional teams of frontend and backend developers, product owners, and Scrum masters on the further development of our platform (). Here you have the opportunity to contribute and continuously develop yourself. We develop complete, highly resilient cross-platform solutions. For this we use an extensive tech stack of different frontend and backend technologies e.g. .Net, Angular, JavaScript, React/ React or Vue.js. You are responsible for the active promotion of our software development team and take technological responsibility. In addition, you are responsible for the implementation of technically demanding requirements from analysis to rollout. You are the contact person in the area of CI/CD, infrastructure, and monitoring/logging. You are also involved in actively shaping the technological decisions within the project, together with our solution architect. Requirements And this is the profile you bring: You have at least 3 years of intensive professional experience as a software engineer in large-scale applications. You have several years of experience with web or mobile applications (frontend, backend, DevOps) - mainly in .Net Core MVC and Microservices. You have very good knowledge of modern web technologies (in . Net/MVC, JavaScript/TypeScript) and current frameworks (Angular, React, or Vue.js.). Also, a plus is an experience with Design Patterns and Test Driven Development, CI/CD (GitLab, CI, Jenkins, Travis), Cloud Platforms (AWS, Google Cloud, Azure), Kubernetes, and Docker. Ideally, you bring experience in designing RESTful APIs and orchestrating microservice architectures to the table. You have experience with or interest in agile development methodologies such as SCRUM and/or Kanban and stand behind the agile values. You have very good English skills - German is a plus! Benefits Your advantages at Quintic Digital GmbH Job and career are one thing, but just as important is a pleasant and friendly working environment with a work-life balance that is suitable for your long-term growth. Join us and celebrate success together. We will customize our work environment to suit you and your personal needs. Look forward to: A flexible working model where you have the opportunity to work on the move, manage your own overtime account and actively manage your working hours. A nice office in the heart of Berlin with free access to a Coffee-Shop, fruits, and drinks. Access to our development libraries and soft skills training opportunities combined with the latest technology trends keeps you on top of your game. An attractive compensation package that you can shape yourself by achieving individual goals. Other benefits that we believe are standard, but should not be forgotten: Employee discounts, the possibility of leasing a company bike or car at company rates, participation in our events, insurance and pension options, and much more... Do you have any questions? Then please contact Adam M. Skafi at [a\[at\]quintic\[dot\]de](mailto:a[at]quintic[dot]de) or apply directly. We are looking forward to your application!

# Senior Frontend / Fullstack Developer

Company: Lisios

location: Cologne, North Rhine-Westphalia, Germany

We are developing the Lisios WaterAlarm, a system to measure water consumption and detect leakages in residential buildings. The system consists of a device which can easily be attached to the mains water pipe by homeowners. In an app, users get detailed information about their water consumption and receive alerts in case a leakage is detected. With our system, we want to protect homeowners from major damage, but also contribute to a more responsible use of the scarce resource water. Fancy working with a small and dynamic team on an innovative product to conquer an emerging market segment? Do you want to contribute with your enthusiasm and experience to bring us to the next level? We do not only offer you the opportunity to grow personally, but also to become part of our exciting journey with many interesting challenges ahead. Join us in our endeavour to develop top-of-the-notch IoT products. Tasks Develop our internal and external user interfaces (mobile/web) Continuously enhance the user experience of our products Implement required backend services and API Maintain our website and shop Come up with ideas for product improvements or new products Participate and contribute to bringing our team to the next level Requirements You have 4-7 years of experience as a frontend or fullstack developer You are a wizard when it comes to JavaScript, CSS and HTML with a comprehensive knowledge of standard compliant web development and responsive design You have worked extensively with state-of-the-art web technologies and JS frameworks like Angular, Vue or React. Ideally, you have experience with cross-platform app development You are passionate about clean code and great user experience You are familiar with Git, experience with Python would be beneficial You have an agile mindset and know your way around agile frameworks like Scrum You communicate confidently in German and/or English Benefits An exciting job in a start-up with a permanent employment contract Flexible work hours and a hybrid model with remote and on-site work State-of-the-art equipment of your choice (Linux, Mac) Budget for external training and/or participation at conferences The usual perks like beverages, fresh fruits and job ticket (for public transport) Freedom and opportunity to come up with your own ideas and to shape the future of Lisios We prefer to employ full-time, but are open to discussing other working time models. We have sparked your interest and you can tick off all of the above? Excellent, please send us your application immediately. You do not meet all the requirements, but you would love to join the team? No worries, we've all been there and we know that it's rarely a 100% fit. So, give it a go.

Are you looking for your next challenge? Do you want a job that's exciting with a team that loves what they do? Then we may have just the thing...At Doodle, we're the kind of people who wake up every morning passionate about what we do. That's what we're looking for in our new Doodlers. You'll be brimming with new ideas, driven by curiosity and don't flinch at the thought of experimenting - even if the test fails. You're someone who challenges the status quo and enjoys pushing yourself and others to reimagine, optimize and innovate. Who Are We? Doodle is the world's leading scheduling platform, helping millions of people instantly set meetings with clients, colleagues and teams. Tapping into the unique nature of smart scheduling with AI, Doodle simplifies the planning of 1:1 and group meetings for busy professionals. As the world's most trusted online scheduling platform, Doodle attracts more than 25 million monthly active users. Now's your chance to join 100+ ambitious engineers, designers, product managers, marketers and salespeople on a mission to make great meetings happen. Be a part of a global team headquartered in Zurich, with offices in Atlanta, Belgrade and Berlin. Who We're Looking For A mid-level engineer who has achieved a deep knowledge of Doodle systems, legacy and new, and can leverage this specialist knowledge to ensure the development of well-engineered, robust, cutting-edge, high-quality software solutions and platforms, understanding complexities of the systems, dependencies, and cross-team considerations. Someone who will own the quality of the respective deliverables. Ideally, You Have Experience as an engineer and in-depth knowledge of both backend technologies including Java with Spring Boot and web technologies including JavaScript (ES5/ES6+) Familiar with the main testing libraries & tools (Jest, Cypress, JUnit, and integration tests) A data-driven and Agile mindset Experience with A/B testing is a plus Eager to learn new technologies Good analytical and problem-solving skills Fluent English What the Role Involves Understanding stakeholder needs and presenting potential solutions Translating business requirements and process plans into technical specifications for software development Developing code using JavaScript and Java, testing and analyzing software solutions, in accordance with the product plan and technical design Deploying the new applications into test environments and assuring high-quality software deliveries Ensuring the company technical strategy is followed in your team deliverables Writing and maintaining system and production documentation Contributing to the maintenance and sustainability of the overall IT architecture Working in cross-functional teams in close collaboration with designers, frontend engineers, and PMs Collaborating with other engineers in the company for changes that impacts shared code What's Awesome About Working at Doodle? Top talent deserves a competitive salary. We're a team that cares about each other. We think we work best when we work together, so you'll always feel included. Diversity is what makes us successful. We all have different strengths and push each other to try new things, innovate and deliver impactful results for the business. Your personal development matters and we mean it. Every Doodler gets a yearly budget to use for anything that promotes your continuous learning (be it an industry conference, language classes, leadership training, or anything else). Your well-being matters to us. Access thousands of beneficial meditation tools with your free Headspace account. Get together with the entire team of Doodlers (from all offices) to connect, bond, play games and unwind at the annual international retreat. Travel to (and spend time with other Doodlers) in some of our lovely offices worldwide. Take advantage of our remote friendly policy. Enjoy complimentary Doodle Premium memberships for you, your friends and your family. Free snacks and fruit in all our office locations. Hiring Journey Applicant initial validation BRYQ Assessment Cultural Fit Interview/ Interview with Hiring Manager Coding Challenge Technical Interview Meet the team Offer So, Get in Touch! At Doodle, we're committed to providing an environment of mutual trust and respect, where equal employment opportunities (EEO) are available to all applicants and teammates without regard to age, race, color, disability, religion, gender and sexual orientation. Diversity and inclusion are of utmost importance to us. We're committed to building a team that represents a variety of backgrounds, perspectives and skills. The more inclusive we are, the better our work and our products will be. We want to hear from you, so please don't hesitate to apply!

is Germany's best-known AI company. We develop neural networks to help people work with language. With DeepL Translator, we have created the world's best machine translation system and made it available to everyone free of charge. Over the next few years, we aim to make DeepL the world's leading language technology company. Our goal is to overcome language barriers and bring cultures closer together. What distinguishes us from other companies? DeepL (formerly Linguee) was founded by developers and researchers. We focus on the development of new, exciting products, which is why we spend a lot of time actively researching the latest trends and technologies. We understand the challenges of developing new products and try to meet them with an agile and dynamic way of working. Our open and positive workplace philosophy enables employees to feel comfortable and thrive in their roles. In our daily work we use modern technologies - not only to translate texts, but also to create the world's best dictionaries, and solve other language-related problems. When we tell people about DeepL as an employer, reactions are overwhelmingly positive. Maybe it's because they have enjoyed our services, or maybe they just want to get on board with our quest to break down language barriers and facilitate communication. What will you be doing at DeepL? As part of our team, you contribute to building up and improving our web-based language data platform. In a dynamic and fast-moving environment which is close to the heart of DeepL - the research on neural networks - we architect, create, improve and maintain a number of web applications which allow our researchers to collect various kinds of linguistic data sets based on input by human language experts, as well as to manage projects for linguistic data collection efficiently. Being part of the research department also means that our work involves a lot of experimentation and iteration, leaving room for individual ideas and initiatives. We strive to get new ideas into production quickly without neglecting maintainability and quality, and we play a very active part in shaping the requirements and UX of our applications. That's why we are looking for people who: enjoy solving difficult problems have a lot of interest in new things, for example new frameworks, programming languages, ... are up to showing a lot of initiative and flexibility while they produce awesome software systems Your responsibilities You build both frontends and backends for various web applications using a modern TypeScript-based stack Designing new solutions that can scale with our growing infrastructure and staff, as well as new requirements and new languages You work closely with our research team and language experts to create the tools we need to explore new research ideas and continuously improve the linguistic quality of our translations Taking responsibility in the areas of work that play to your strengths (e.g. architecture, security, UX, DevOps) What we offer Make an impact! We break down language barriers worldwide and bring different cultures closer together Experience the excitement of a rapidly growing scale-up. Over the last year we doubled in size with employees located across UK, Netherlands, Germany, Poland, and Japan We've got your back. We are an experienced, highly committed team with transparent decision-making processes. We cherish collaboration and efficiency, but the human approach, trust, empathy, and inclusivity are just as important Flexible work arrangements: with office hubs in Cologne and Berlin you choose where and how you work. We offer fully remote work Regular innovative team-building events – internationally, as well as whole company events The opportunity to shape a product experience for an unlimited market with a diverse customer base (international customers, from start-ups to large corporations) Hack-Fridays – Every month we have a dedicated, interruption-free day on a company-wide scale to work on a project of your choice. Whatever it might be, if it means something to you, this is your day to do it. Stay healthy – We offer a private health and travel insurance that comes with a bonus you can spend on vision, dental or any other needs With our people-centric approach, we value Life-Domain Balance and mental well-being! Therefore we offer 30 days of holiday and provide a mental well-being app with access to psychologists, group sessions, and self-guided learning tools Annual education budget to advance your skills with courses & qualifications of your choice About You At least 3+ years of full-stack development experience or a degree in Computer Science or similar + at least 1 year of work experience (academic or industry) Good knowledge of web and JavaScript/front-end technologies (HTML, CSS, JS, ideally TypeScript) Experience in working with modern JS frameworks, e.g. React/Next.js Good knowledge of backend development, e.g. with Python or Node.js, and in dealing with backend frameworks, e.g. FastAPI or NestJS Experience with databases (preferably relational) Fluent in English Nice to have: You are comfortable with Linux environments and have already had contact with Docker and ideally with Kubernetes Experience in working with research data infrastructure

What we're looking for Dive with us into the unknown, be creative, innovate and let us build great digital products together ☺ - We're looking for people that are happy to work in entrepreneurial, flexible but fast growing and changing environments. ☺ - We are looking to establish a diverse team - for us that means that we are both welcoming people who are like us and people who are unlike us. This includes but is not limited to gender, ethnicity, age, academic or professional background, character traits etc. No matter what your background is, feel free to apply at hubblr. The role in a nutshell We are looking for a persona with experience in both frontend and backend who drives our success in client projects, participate in architectural & technical decisions and is able to build a digital product from early stages to scaling it up. Keywords: software engineering, medior, senior, consulting, fullstack About Ushubblr is a young company with a lot of passion for software developing and innovation. As an independent, young and agile team we develop with our clients comprehensive software applications while also consulting them in topics like product market fit, UI/UX-design and strategic software development. The hubblr team loves and lives product innovation. Therefore we also work on our own, internal projects creating new business models, testing them in their market segments and, if successful responses are measured, we bring them together to life. Your benefits A young and sympathetic team Flexible working hours A lot of room for your own ideas. We always highly encourage you to work on them together with the team. ☺ - Modern offices at Hamburg "Oberhafenbrücke", the Münster "Prinzpalmarkt", at the "Görlü" park in the factory Berlin or fully remote and in our VR-office in Spatial - that's up to you! Choose your tech equipment and education material A free public transportation ticket or bike with a maintenance agreement in the city you work in Regular team events and a creative working atmosphere CCC Ticket or other educational trainings / tools on request Bring your dog to work ☺ - A progressive work environment - we provide VR Glasses (Oculus Quest 2) for you to experience immersive meetings from a distance A steep learning curve on internal and client projects and lots of ownership and responsibility from day one Your Responsibilities You will be joining a growing team of 17, located in Münster, Hamburg, Berlin, Munich, Cologne, Aachen and Sweden Together with our team you will be working mainly on client-projects and sharing your experience with team members You will be working mainly on backend and frontend related tasks in our projects You will be actively participating in architectural and technological decisions for software projects You will take over own responsibilities in projects, estimate developing tasks on your own and giving other coworkers advice on their work You'll be reviewing code from other coworkers and actively be part of continuous improvement When working on client-projects you will be partly responsible of communicating with their CTO / Stakeholder, joining conference calls/meetings on status update, time estimation and project management Your Qualifications Experience in modern web technologies - Vue.js, React.js or similar framework (must-have) Experience in modern backend technologies - i.e. Golang, Node.js (must-have) Familiarity with agile software developing methods (must-have) Experience in common API techniques - HTTP, GraphQL, GRPC - at least 1 of them (must-have) Communication skills for constructive team feedback and client calls (must-have) Fluent in English (must-have) Living in the European Union (must-have) Experience in E2E tests (nice-to-have) Experience in TypeScript (nice-to-have) Experience in Tailwind CSS (nice-to-have) Experience in CI/CD processes (nice-to-have) Ability to independently work on tasks (nice-to-have) Communication skills for constructive team feedback and client calls (nice-to-have) The application process ☺ - Does this position sound like a good fit? Just fill out the form below - it only takes a few minutes. How will the application process look like? (Our aspiration to a good job application process will guide you from your initial email to a final job offer within 3-4 weeks. Weekly Screening (up to 1 week) You can expect us to screen your application within one week. You'll definitely hear from us - no matter the outcome of our decision First Round: Cultural Fit (1 week and 1 meeting) You get to meet one of our hiring managers in a 60 min. google meeting where we'll discuss why you want to work at hubblr personal values & cultural fit overview about hubblr & our client overview about your job @hubblr and future perspectives salary expectations Second Round: Job Fit (1-2 weeks and 1 meeting + challenge) We'll evaluate with you how well you fit to the job at hubblr. Depending on the type of job you're applying for this might include Coding challenge (typically 1 week time to work on it) (for Coding related jobs) Discussion about job related tasks & approaches to your work and solutions The round will end with a meeting where we can talk about the job fit further questions / expectations / start date Final Decision (up to 1 week) We'll discuss within our team your fit We'll reach back to you within a week after the second round Frequently Asked questions (FAQ) "How can I make sure my application is as good as possible and is likely to be forwarded in the next stage?" To make your application as outstanding as possible, you can make sure to cover a few things: Provide as much context as possible by uploading all of the documents we ask for and answering all the questions ' Linking a meaningful video quickly introducing yourself and your professional experience ' Structuring and designing your resume according to this resource ' Writing a cover letter that adheres to the tips outlined here ' "How does the application process look like?" We have outlined the entire application process above. "I do not feel like the current roles on the job board fit me." We also happily accept initiative applications. There is a separate job post for them on our job board. "I do not live in one of your hubs in Germany or Spain - can I still apply?" You can for sure! If you live in another country than one we are currently operating in (Spain and Germany), we would ask you to either relocate to one of our hubs or evaluate whether freelancing is an option. We do that because opening a

location in another country is coupled with a lot of overhead. If you already live in a country where we operate, remote working is perfectly fine. "I live in a country where you operate, but relocation within the country is not an option - Can I still work for you?"Yes definitely! The willingness to relocate inside countries where we operate is just one factor we consider in applications. If you score well on other dimensions, there is no problem hiring you. "I need to relocate and I am willing to do that as well - can you help me in any way with that?"Yes. We can help you with the administrative aspects of relocating to countries where we operate. It is also no problem if you need a working permit etc. - We will help you to the best of our abilities. "What do you mean with choose your own tech?"We have the credo that we give you all the tools you need to efficiently do your job. This does not only extend to physical equipment but also education material. Choose your own tech means that if you feel like you need any physical or educational equipment, we will try to make it possible for you. Does this position sound like a good fit?We would be very happy to welcome you! Ø>Ÿ
